

Name: Lewis Halpim

My submission fulfils the following conditions to pass:

Software compiles	Yes
Populated Git repo consistent with DLE submission exists	Git link: https://github.com/sniffleslou-lab/comp3016CW2silver
OpenGL in C++ with vertex and fragment shaders loaded with a quad displayed and signature feature visible.	List your signature(s): 
Write up and video explanation submitted	Filenames: readme.md Youtube: https://youtu.be/WzwAMtOtyk

My CW2 project has the following features

Feature	Description	Category	Marks Claimed	Marks Awarded (for ML use)
MVP Implemented	MVP transforms implemented in lines shader.vert and shader.frag in main //now we are loading the shaders ShaderInfo shaders[] = { {GL_VERTEX_SHADER, "../shaders/vertexShader.vert"}, {GL_FRAGMENT_SHADER, "../shaders/fragmentShader.frag"}, {GL_NONE, NULL} };	40-70 Marks		
Textures	Mixed textures a.png and b.png in shader.frag Loaded with stb_image.h	40-70 Marks		
Keyboard/mouse movement	Basic controls implemented through camera.cpp and main.cpp in the renderloop	40-70 Marks		
loadshader	Loads custom vertex and fragment shaders (based on lab 5)			
Project package	Project should load when solution is clicked			
Video and readme	Both included in submission			
Total Feature Marks			25	
Passing Marks			40	

Minimum marks expected (not including aesthetics)		65	
ML Feedback:
